

Shoal Creek Boulevard Improvements Update

Following the meeting in May at Gullett Elementary School, information on the project and the response from the public has been given to the city manager for review. City staff continues to evaluate the improvements to the boulevard which mainly consist of weekly informal observations. Formal traffic counts, working on raised pavement markers and considering painting additional markings on the pavement are on hold pending the review.

The most timely information on the SCB project is posted to the new website (www.allandalereporter.org) and the newsgroup (<http://groups.yahoo.com/group/allandale/>) as additional information or updates are received from the city.
